PRODUCT SAFETY AND SELECTION NOTICE

Effective as of September 8, 2026.
This notice supersedes all prior versions published on this site.

WARNING: FAILURE TO PROPERLY SELECT, SIZE, INSTALL, OPERATE, OR MAINTAIN THE PRODUCTS DESCRIBED ON THIS SITE CAN RESULT IN DEATH, SERIOUS PERSONAL INJURY, AND PROPERTY DAMAGE. Hydraulic pumps and related components operate under high pressure and involve rotating and hazardous energy. Risks include, without limitation, high-pressure fluid injection injury, component failure under pressure, fire or explosion from atomized or pressurized fluid, and injury from rotating or hazardous energy during installation, operation, or maintenance. This notice does not describe every hazard associated with every product; it is not a substitute for the User's own hazard analysis for its specific application.

This website, Permco's product catalogs, and technical materials describe product and system options for evaluation by persons with appropriate technical expertise. They are provided for informational purposes only and do not constitute engineering advice or a recommendation that any particular product or system is suitable for any particular application.

Responsibility for Selection and Application. Any customer, original equipment manufacturer, systems integrator, distributor, or other purchaser or user of Permco products (collectively, "User") is solely responsible for:

- conducting its own analysis, testing, and evaluation to select the appropriate product and system for its intended application;
- confirming that the selected product and system meet all applicable performance, endurance, maintenance, safety, and warning requirements for that application;
- complying with all applicable industry standards, including but not limited to ISO 4413 (hydraulic fluid power systems), ISO 12100 (safety of machinery — general principles for design and risk assessment), the National Fluid Power Association's NFPA/T2 series standards, 29 C.F.R. § 1910.147 (control of hazardous energy) where applicable, and, for products placed on the market in the European Union, the applicable EU machinery safety instrument in effect at the time;
- following all product information Permco or its authorized distributors provide with the specific product; and
- evaluating all reasonably foreseeable uses and misuses of the product and system, including use in combination with other equipment.

Where Permco or its authorized distributors provide product or system options based on data or specifications supplied by the User, the User is solely responsible for the accuracy, suitability, and sufficiency of that data and those specifications for the User's application.

Order of Precedence. To the extent Permco provides an installation, operation, and maintenance manual or other product-specific documentation for a particular product, that documentation controls over this notice with respect to installation, operation, and maintenance instructions for that product in the event of any conflict.

Modifications and Non-Genuine Parts. The safety information referenced above assumes the product is used as manufactured and unmodified. Modification of a Permco product, repair using non-Permco-authorized parts or service providers, or substitution of non-genuine components voids the applicability of Permco's safety information and warnings to that product as modified or repaired.

Not a Substitute for Independent Engineering Judgment. This notice is not exhaustive and does not relieve the User of its independent obligation to identify and address hazards specific to the User's application, industry, and jurisdiction.

Relationship to Terms of Sale. This notice does not modify, and is not a substitute for, Permco's applicable terms and conditions of sale, including any warranty disclaimers or limitations of liability set forth therein. In the event of any conflict between this notice and Permco's terms and conditions of sale with respect to warranty or liability matters, the terms and conditions of sale control. Nothing in this notice is intended to create any warranty, express or implied, or to expand Permco's obligations or liability beyond those established by applicable law and Permco's applicable terms and conditions of sale. Permco reserves all rights and defenses available to it under applicable law.
